SUBJECT:

IVCBVB TNT/TMA Appointment

Background

As discussed earlier this year with the Board, Staff has been working with the Truckee North Tahoe/Transportation Management Association on their board seats and representation from the Incline Village/Crystal Bay area. Historically, there has been a membership elected position from IVCB on the TMA board. However, we expressed our interested with the TMA executive committee in having a dedicated seat appointed by our organization. This change was recommended and approved by the TMA membership in July. Our appointed representative will be seated at the TMA's October meeting

Requested Action

Pending discussion, Staff requests Board to provide direction and action on our Incline Village Crystal Bay representative to serve on the TMA board of directors and to direct staff to draft a letter to the TMA board requested our representative be seated at their October meeting.

Background

Dean Runyan and Associates is a well-regarded research firm working in the tourism industry through the United States. Staff has worked with Dean Runyan for many years in the development and creation of the NLTRA's North Lake Tahoe Economic Significance of Travel report that most recently was revised in 2016. This report takes an in-depth look travel economic impacts as it relates to overall tourism spending, tax receipts and jobs. However, the current report only takes in consideration the California side of the North Shore tourism industry.

Staff has reached out to Dean Runyan to complete an Economic Study on the Nevada side of North Lake Tahoe to provide in-depth tourism impacts. This will allow North Lake Tahoe as a region to look at complete data on our tourism impacts.

Requested Action

Staff will provide an overview of the most recent California report and requests board action to contract with Dean Runyan on a Nevada data report.

Exhibit A Scope of Work

Task 1: Direct Economic Impact of the Lake Tahoe portion of Washoe County

We will document and describe important economic impacts of travel for the North Lake Tahoe portion of Washoe County (Nevada side) from 2012 through 2017, including visitor spending and the overall structure of jobs, earnings, and tax receipts at the state and local level that are a direct result of expenditures made by visitors traveling to and through the Lake Tahoe portion of Washoe County. Findings will be broken out by type of overnight accommodation (i.e., paid lodging, vacation/second home, and campground). Estimates for the impact of day travel will be included as well.

For analyzing direct impacts we will make use of a wide variety of visitor and other economic data, including but not limited to:

- Previously collected data and estimates of Nevada travel impacts produced by DRA for Travel Nevada.
- County level employment and earnings from the Bureau of Economic Analysis' Regional Economic Information System (REIS). The REIS earnings estimates include payroll, other earned income and proprietor income.
- County level payroll and employment data from the Nevada Department of Employment, Training, and Rehabilitation.
- County Business Patterns zip code data (establishments, employment, payroll by selected NAICS codes).
- Lodging tax receipts from Washoe County and other sales tax data from the Nevada Department of Taxation.
- Housing data for vacation/seasonal homes (Census, CoreLogic information systems, local sources).
- Inventory of overnight campsites from federal, state, local and commercial sources.
- Population and household estimates of the US Census.
- Survey data on travel spending and travel behavior from OmniTrak Group.

We will make use of the Regional Travel Impact Model (RTIM) designed to take into account unique specifications relating to the travel and tourism industry and provides the most reliable direct impact measurements. We will use the results of this analysis as input in the subsequent task to develop secondary impacts of the visitor industry.

Cost: \$6,800

Task 2. Secondary Economic Impacts (specific to Washoe County)

DRA will measure these secondary impacts using an input/output model developed specifically for the Lake Tahoe portion of Washoe County, with the findings described above used as input. These economic impacts will include employment and earnings for each major economic sector, and fiscal impacts in terms of sales-generated tax receipts at the local and state level.

Cost: \$4,900

Task 3. Visitor Volume

We will provide visitor volume estimates by type of accommodation (calendar year 2017). We will make use of the most survey data available, adjusted accordingly for annual price changes.

Cost: \$4,300

Task 4. Construction and Real Estate Assessment

The primary emphasis of this task involves estimating segments of construction and real estate employment in the Lake Tahoe portion of Washoe County collecting available housing and construction data from U.S. Census Bureau. Construction activity on new and existing residences will be estimated from employment, payroll and earnings data, as well as building permit data. To determine the number of vacation homes, housing data may be purchased from CoreLogic, depending on the availability of the county tax assessor records.

Cost: \$6,400

Task 5. Report Preparation and Presentation

Subsequent to your review, we will provide a final pdf copy for use on your website, and one unbound copy for duplication purposes. Specified detailed data tables can also be provided in electronic format. We will also present a summary of the study's major findings to the IVCBVB and/or other interested parties in a format of your choosing. Travel costs are included.

Cost: \$3,500

Exhibit B Budget Breakout

The total budget for the project, as specified in Tasks 1 through 5 and including travel and other incidental costs, is \$26,900. A breakout by task is as follows:

Direct Economic Impact	6,800
Secondary Impacts	4,900
Visitor Volume	4,300
Construction/Real Estate	6,400
Report/Presentation	4,500
Total	\$26.900

DRA will submit periodic invoices based on the proportion of completion of each project task.
